Welcome to Slovakia and the Trnava Region

The Slovak Republic is located in Central Europe and features a mild climate. It was established on 1 January 1993 after Czechoslovakia was peacefully divided. Since 1 May 2004, Slovakia has been a member of the European Union. The country has a population of 5.5 million inhabitants and covers an area of 49,000 km². The capital city, Bratislava, is situated on the western border with Austria. Slovakia comprises eight regions, one of which is the Trnava Region. The Trnava Region is located in the most economically developed part of western Slovakia, as evidenced by its excellent transport connections. It shares borders with three other countries: the Czech Republic to the north, Austria to the northwest, and Hungary to the south. The region is conveniently located close to several major cities. Trnava, the regional capital, is:

- 45 km from Bratislava (international airport)
- 35 km from Piešťany (international airport)
- 110 km from Vienna (international airport)
- 215 km from Budapest (international airport)
- 400 km from Prague (international airport)

All these cities are connected to Trnava by multi-lane highways and regular international express trains. The Trnava Region is linked to the European network of international routes and highways via the E65 (D2) to the Czech Republic, and via the E75 and E58 to Austria – the E75 continues through Slovakia to Poland and Ukraine.

7 Reasons to choose the Trnava Region:

Climate

The Trnava region has a mild continental climate characterized by distinct temperature differences between summer and winter, as well as by four seasons. Yet in recent years, the transition from winter to summer has taken place almost without a spring: with winter weather and average temperatures of around zero degrees Celsius abruptly changing to a summer climate from one day to the next. The same applies to the transition from summer to winter, which happens quickly, with autumn usually being distinct but short. Winter snow cover now tends to be less pronounced than in the recent past. We recommend checking local weather reports before your trip.
